645	Online overlay map
646	Locus SQLite map
647	Screen scaling factor
648	The screen scaling factor scales all controls. This is useful for instance if you need bigger buttons. A good scaling factor for getting bigger controls is '1.5'. NOTE: the application has to be restarted after changing this setting.
649	Folder
650	Add folder
651	Do you really want to delete the folder? All elements in the folder will be moved to the root folder.
652	Getting started/Help
653	Do you want to open the 'Getting Started' website with detailed instructions for loading maps, and styles?
654	Raster maps subtile count
655	The subtile count specifies the number of lower zoom level tiles which are used for stitching non-existing higher level tiles. A higher number results in slower processing while a lower number leads to more incomplete high zoom level tiles.
